Accident Fund Automation

E-business made easy

eLink and AFXpress

eLink is your efficient way to do business online with Accident Fund. We made our system intuitive with an "agent-centric" focus so we can be your ease-of-doing-business partner. Our AFXpress model enhances your e-business experience by:

- Expanding pricing authority, which allows you, in many cases, to quote, re-quote and bind without referral.
- Broadening our underwriting appetite for new business.
- Offering our *Target Price* functionality that allows you to quickly rate to the lowest approved price.

The eLink system's additional functionality includes:

- Smart Edits that display eLink errors or missing information and provide a direct link to them, making corrections quick and easy.
- Policy inquiry screens that give you detail on your accounts, including transactions, audit information and experience mod worksheets.

- The ability to print your daily documents from one centralized location within the system.

Download

Download automatically updates your agency management system each night with declaration page information. These updates eliminate the need to manually key in information. Download updates your system with policy detail for new business, renewals, endorsements and cancellations.

We continuously look for ways to improve our system so that doing business with us always remains easy and efficient.

Real-Time – Providing Efficiencies

Real-Time is the efficiency that commercial lines have been waiting for. By integrating this technology into your daily workflow, tasks become easier to complete and require less time, allowing you to serve your customers better. Real-Time gives you the ability to click a button in your agency management system for immediate access to information on your client without having to remember your password.

How Does It Work?

- Access your customer's file in your agency management system.
- Click the *TransactNOW* or *Blue Butterfly* button.
- Select *Inquiry* or *Rating*
 - Inquiry — The system retrieves the most current information in a PDF in a matter of seconds.
 - Rating — The data is bridged into eLink for quick quoting.

As the WorkSafe People™, we're experts at helping our customers keep their workers safe and their costs down. A trusted name in workers' compensation for a century, Accident Fund is financially strong and stable, rated "A-" (Excellent) by A.M. Best.

Accident Fund Insurance Company of America is a member of Accident Fund Holdings, Inc. All policies are underwritten by a licensed insurer subsidiary of Accident Fund Holdings.

What we offer:

Policy Inquiry

With Real-Time Policy Inquiry, users can quickly retrieve an electronic PDF of the insured's copy of the declaration page for easy viewing and printing.

Direct Bill Inquiry

Real-Time Direct Bill Inquiry allows you to stay in your agency management system and view billing detail using the same information that Accident Fund's Service Center utilizes.

Rating

Real-Time Rating takes information from your agency management system's ACORD Application and populates it into eLink. This eliminates any double entry.

Website Sign-on

Website sign-on allows you to navigate our site with the click of a button, eliminating the need to pull up our site and manually log in.

Loss Runs

We offer convenient, easy-to-use online loss runs. You can run reports quickly by using the policy name or number. It is available by selecting the Claim Inquiry or Loss Runs view feature. Online loss runs include the following features:

- Ability to produce graphs and charts by injury type or other criteria
- Option to save as PDF and email to customers
- Automatic scheduling (eliminates the need to run the reports each month)
